## **DETAILED ACTION**

### **Status of Claims**

1. This action is in reply to the US Application filed on 07/24/2003.
2. Claims 1-16 are currently pending and have been examined.

### **Information Disclosure Statement**

3. The information disclosure statements (IDS) submitted on 07/24/2003, have been considered. Initialed copies of the 1449 Forms are enclosed herewith.

### ***Double Patenting***

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir.

Art Unit: 3609

1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

5. A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

6. Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. **Claims 1-16** are rejected on the grounds of nonstatutory obviousness-type double patenting as being unpatentable over claims 81-94 of U.S. Patent No. 7,051,206 B1. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant application fails to disclose a third party digital signature. U.S. Patent No. 7,051,206 B1 discloses the inclusion of a third party digital signature, etc. in at least claim 81. It would have been obvious to one skilled in the art at the time of the invention to incorporate a third party digital signature to further prevent unauthorized tampering of the document.
